PROFESSIONAL SUMMARY

AI Solutions Architect specializing in **production-grade workflow automation** and **full-stack web development**. Designed and deployed a **6-platform content distribution engine** (74 n8n nodes, **99.7% reliability**, 1000+ executions) at **\$0/month** operational cost. Built production **Next.js 15** platforms generating **₹300K+ revenue** with **95+ Lighthouse** and **#1 SERP rankings**. Expert in **workflow orchestration**, **prompt engineering**, **RESTful API integration**, and **system design** – bridging AI capabilities with scalable web applications to drive measurable business outcomes.

TECHNICAL SKILLS

- **AI & Automation:** n8n Workflow Orchestration (Expert), Multi-LLM Routing (Gemini, GPT, Claude), RAG Pipelines, Prompt Engineering (XML/CoT/6-Point Reinforcement), Model Context Protocol (MCP), AI Agent Design, Human-in-the-Loop (HITL) Systems, Agentic Workflows, AI SEO/AEO Optimization
- **Frontend:** Next.js 15 (App Router, Server Actions), React 18, TypeScript, JavaScript (ES6+), Tailwind CSS, ShadcnUI, Framer Motion, Progressive Web Apps, Core Web Vitals, Responsive UI/UX
- **Backend & Data:** Node.js, Python, Express.js, Firebase (Auth/Firestore), Supabase, PostgreSQL, SQL, Sanity CMS (Portable Text), REST APIs, OAuth2, Webhook Architecture, Event-Driven Systems
- **DevOps & Tools:** Docker, Git/GitHub, Vercel, Cloudflare, GCP, Linux System Admin, Postman, CI/CD, Notion API, Google Drive API, Twitter API, LinkedIn API
- **Product & Process:** SDLC Ownership, Cross-Functional Collaboration, Stakeholder Management, Technical Documentation, Root Cause Analysis, Agile/Scrum, System Architecture

WORK EXPERIENCE

AI Workflow Architect & Full-Stack Developer

Independent Consultant – AI Automation & Web Solutions

Jan 2024 – Present
Delhi, India (Remote)

Aviators Training Centre – AI-Powered Flight Training Platform

[Live](#) | [GitHub](#) | [Docs](#)

- Developed production platform with **Next.js 15**, **TypeScript**, **Firebase** achieving **95+ Lighthouse score**, **96/100 SEO**, and **sub-2s load times**
- Generated **₹300,000+ revenue** from **50+ organic leads** (12% conversion rate) with **₹0 ad spend** via AI-driven SEO strategy
- Drove **90.5K+ Google impressions**, **420+ organic clicks**, and **#1 SERP rankings** for niche aviation queries
- Architected **n8n automation suite** with **3-layer validation pipeline** (Array/ID/Schema) and DLQ architecture, reducing manual CRM work by **80%** (saving 20+ hrs/week) at **99.7% reliability**

Barkat Enterprise – Premium B2B E-Commerce Platform

[Live](#) | [GitHub](#) | [Docs](#)

- Delivered high-performance **React 18 + Vite** B2B platform with **3,000+ viewers** and **60+ organic leads**
- Built **in-browser PDF catalog viewer** with dynamic product filtering and **WebP optimization** delivering **sub-2s load times**

KEY PROJECTS

Omni-Post AI – 6-Platform AI Content Distribution Engine

[GitHub](#) | [Docs](#)

- Orchestrated **74-node n8n workflow** distributing content across **6 platforms** (X, LinkedIn, Threads, Sanity Blog, Dev.to, Hashnode) with **session-based concurrent execution safety** and **Decision Engine V5.0** for intelligent image routing
- Achieved **99.7% reliability** (997/1000 executions) at **\$0/month** via **XML-based prompt architecture**, **multi-LLM model routing** across 5 API keys, and **4-layer error handling** (retry, graceful degradation, fail-fast, partial success)
- Integrated **Obsidian MCP Context Engine** for real-time dynamic context injection and **Tavily AI Agent** for market intelligence, replacing \$20/mo Perplexity dependency while improving research depth
- Created platform-specific parsers: **LinkedIn S-Tier HTTP Pipeline** (multi-image/PDF carousel), **Sanity Portable Text V16**, **Threads 30s container API**, cutting content production time by **95%**

N8N GitHub Backup V5 – Self-Healing Workflow Backup System

[GitHub](#)

- Constructed dual-stream Loop-to-Webhook architecture attaining **99.9% recovery rate** (up from 85%) with **zero-trust security**: recursive JSON traversal scrubbing all credentials before Git commits
- Maintained **100% GitHub API rate limit compliance** via mathematically proven 2-second delay pattern

EDUCATION

Bachelor of Technology in Electronics and Communication (ECE)

Maharaja Surajmal Institute of Technology, GGSIPU

2020 – 2024
CGPA: **8.74/10 (87%)**

CERTIFICATIONS

Namaste React (Akshay Saini) | Namaste JavaScript (Akshay Saini) | 100 Days of Code: Python (Angela Yu)
